

Water has the Secret of Life!

https://www.dinecollege.edu/about_dc/nifa-usda-tcrgp-internship/

- *We offer services to understand how to clean your water.
- *We are here to provide fundamental knowledge to test your water for hazardous chemicals and germs (E.coli and H. pylori) that may create health concerns.
- *We can assist you with finding suitable solutions to purify and filter your household water.
- *We are here to provide hands-on workshops, in- field training, webinars and water fairs.
- *We are here to build awareness to conserve your natural water resource and learn alternate ways for potential water reuse.

SOME FACTS ABOUT WATER IF IT IS NOT CLEAN

-About 7.2 million Americans get sick every year from diseases spread through water.

-CDC estimates that each year 1 in 44 people gets sick from waterborne diseases in the United States.

-In Arizona, enteric diseases accounted for 9% of communicable diseases reported between 2010 and 2015, for a total of about 17,000 cases.

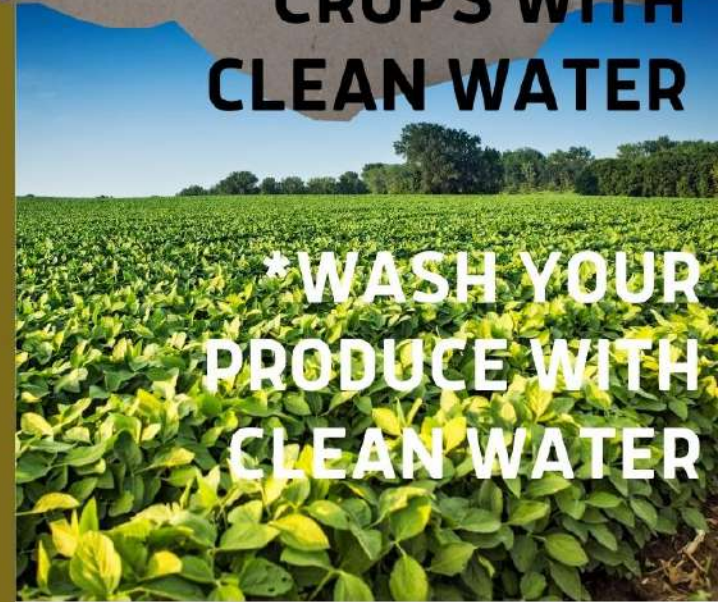

-Most of all, simple precautionary measures, proper disinfection, and filtration can make water not only free of hazardous chemicals and Germs, but also a healthy drink.
