

Optimize the way your videos display

Zoom offers optimized screen sharing of a full screen video clip. This setting increases the frame rate of the screen share while playing the clip. This feature is optional but recommended

1. Select Share Screen
2. Choose what to
3. Check the Optimize for full-screen video clip at the bottom of the share window
4. Click share screen
5. Go full-screen when playing back your video clip for the best experience
