Zoom Tips for Weak/Unstable Internet Connections

1. If host share host Privilege
   a. Prevents complete disconnection from meeting
2. For Audio use dial in number instead of computer audio
   a. Provides stable audio connection
   b. Use Bluetooth or Wired headsets for improved sound quality
   c. Prevents you from audio disconnection if internet fails
   d. Could allow video to run
3. Depending on your cellular device use mobile hotspot
   a. Could provide LTE internet connection suitable for zoom meetings
   b. If wired internet goes down cellphones could possibly still provide internet connection
